SMOG TECHNICIAN TRAINING OPPORTUNITY

The Smog Check Referee Program has Student Technician training opportunities available throughout California!

- Enhance your automotive training working alongside the BAR Referee
- Gain invaluable hands-on experience performing emissions inspections
- Learn and train on “live” vehicles in a “real world” environment
- Comprehensive 240 hour and condensed 40 hour programs available
- Earn compensation performing on-the-job training

GENERAL DESCRIPTION:

The Foundation for California Community Colleges Smog Check Referee program supports the training of hundreds of future smog technicians through the Student Technician Training Program (STTP). The STTP is a comprehensive 240 hour training program (40 hour program may also be available), which employs extensive hands-on exercises designed to aid in the preparation of automotive students to become high-performing, professional smog technicians.

TRAINING OBJECTIVES:

The STTP reinforces the core skills needed to become a successful smog technician. Additionally the STTP gives each student training in the areas of safety, communication, and administration. This additional training helps to ensure students learn the essential skills necessary in order to become a competent, high-performing professional technician in today's automotive test and repair industry.

STUDENT REQUIREMENTS:

Must have successfully completed BAR Level 1 Training. Must maintain minimum GPA of 2.0 and maintain a minimum of 6 semester units (or equivalent). Courses must be in Automotive Technology or required courses for a degree or certificate in Automotive Technology. A valid CA Drivers License is required. Must pass a background check and drug screening.
